

# Video Marketing Blaster Pro Review

I know how it feels to spend hours creating and editing videos for YouTube. You upload them, wait a few days, only to find that you're getting very little views... It sucks! That's why I'm writing this Video Blaster Pro review. It solves the biggest problem you, me and every other person creating YouTube videos faces... Getting your videos to the top of YouTube and pulling in crazy amounts of free views from people who are searching for your content. It works extremely well, and you'll have a clear advantage over your competitors. Check it out [here](#). Or, keep reading to find out how in my full review and walk-through below.

## What Is Video Marketing Blaster Pro?

VMB Pro is a software tool that will research, analyze and create your entire YT videos details in a matter of minutes. This includes analyzing the top YouTube videos based on your selected keywords to scraping article content and creating your video titles, descriptions, tags and more.

Below is a video I made showing how easy it is to use and how effective it is in both YouTube and Google.

## #1 The Keyword Finder

Finding the right keywords and then optimizing your videos for those keywords is essential if you want to have any success in YouTube. Especially if you don't have a lot of followers and subscribers. Video Blaster Pro's keyword finder will get you hundreds of keywords for your video. All you have to do is enter the topic of your video and in moments you'll have a list of keywords related to your video that people are actively using to search YouTube.

Enter the topic of your video and Video Marketing Blaster will go out and find dozens of keywords for you to rank for

*In the above image, I've entered in a random phrase related to web hosting. Video Marketing Blaster then went about finding dozens of related keywords which I could choose to rank for. Eventually I decided on the keyword "fast secure WordPress hosting". A keyword that has 5 970 other YouTube videos uploaded, that are trying to rank for it. After selecting the keyword, it was time for me to head to the niche analysis section to get an in-depth report of how easy it would be to rank at the top of YouTube.*

## #2 Accurate Analysis

Let Video Blaster Pro find you the best and easiest keywords to get your videos to the top of YouTube fast, so you can enjoy a ton of free views. This is one of my favorite features of Video Blaster Pro. Knowing which keywords to target when you upload your video is already half the battle won. Get it right and you can easily get hundreds of views just days after uploading your video. Video Blaster Pro looks at your selected keywords, then analyses all the top videos that are currently showing for them at the top of YouTube.

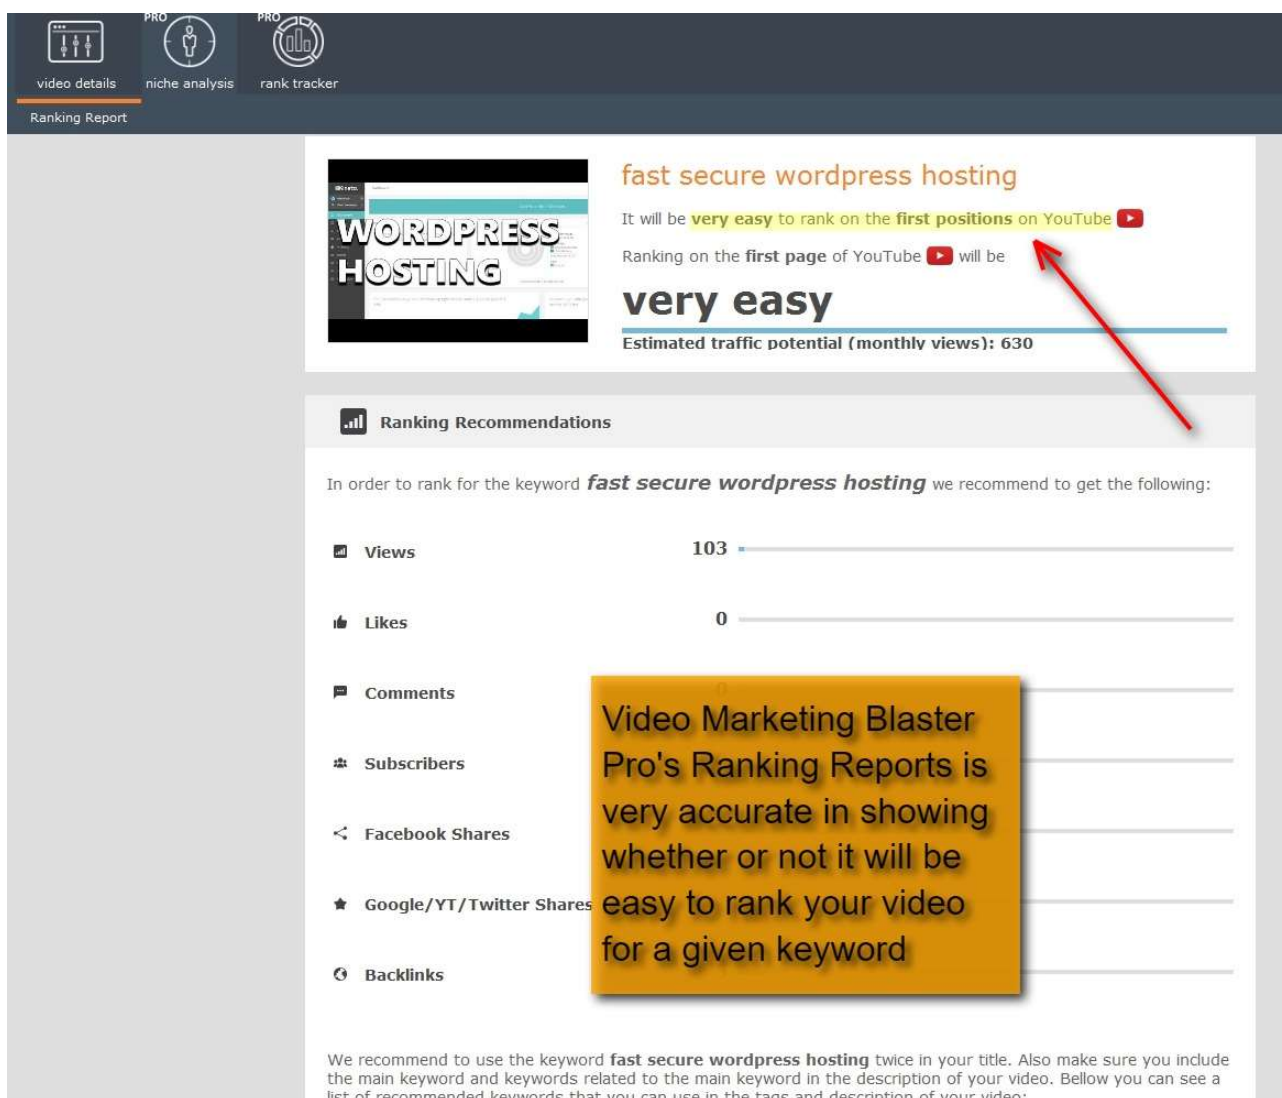

The screenshot displays the 'Niche Analysis' section of the Video Marketing Blaster Pro software. It shows a table of top-ranked YouTube videos for the keyword 'fast secure WordPress hosting'. The table includes columns for video details, views, comments, likes, shares, and scores. A text box overlay states: 'Video Marketing Blaster analyzes all the top ranked videos and shows you how well they are optimized for the given keyword'.

*In the in-depth niche analysis you can see all the top ranked*

*YouTube videos of your competitors broken down, so you can see exactly how well optimized they are for your keyword. I don't really pay much attention to this section. The Ranking Report in the next image is what matters to me. Video Marketing Blaster Pro generates a ranking report which shows you how easy it will be for your video to outrank your competitors and show up in the top spots. But, it doesn't stop there. It also shows you how many views you can expect every month from those keywords, as well as what you can do to boost the rankings.*

*From the ranking report, "fast and secure WordPress hosting" should be easy to rank for. Finally, the Analysis section of Video Blaster Pro will also show you if it will be easy for your video to show*

up on the first page of Google, so you can get even more free views to your videos.

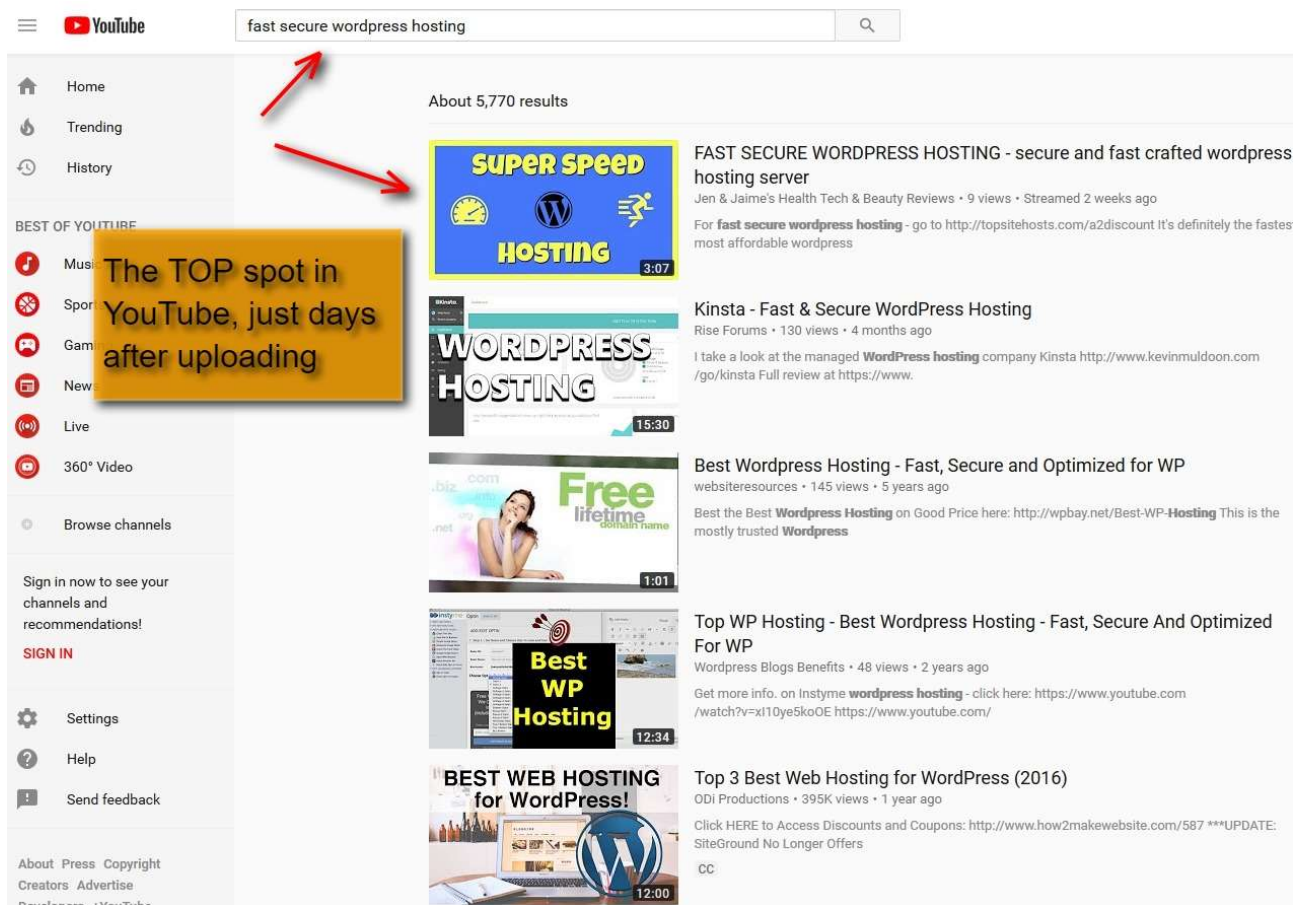

*For this test I wasn't really interested in ranking the video in Google. Video Marketing Blaster Pro says it would be difficult to do, and my video sucks, so I'm not expecting any revenue from it.*

## #3 Automated Optimization for Top YouTube Rankings

Here's where the magic happens. I don't know about you, but I hate writing descriptions and trying to find tags for my YouTube videos. It gets old rather quickly having to write a 300+ word description for every video upload. However, you can't ignore it because the title, description and tags you choose are crucial for getting ranked highly in YouTube. Luckily, Video Marketing Blaster does all the heavy lifting for you. Once you have decided on the keyword you want to optimize your video for, Video Marketing Blaster quickly creates a perfectly optimized title and description, as well as highly relevant tags for the keyword. All you then have to do is simply copy and paste them when you upload your video.

The screenshot displays the Video Marketing Blaster Pro interface. On the left, a navigation bar includes icons for dashboard, keywords, video details, niche analysis, and rank tracker. Below this, there are buttons for 'Export' and 'Save to web'. The main area is divided into two columns. The left column contains a text box with the following text: 'Video Marketing Blaster generates perfectly optimized titles tags and descriptions so that you can quickly upload videos that will rank easily for your chosen keywords'. The right column contains a form for generating content. The 'keyword' field is filled with 'fast secure wordpress hosting'. Below this, there are fields for 'title', 'description', and 'tags'. The 'title' field contains 'fast secure wordpress hosting - secure and fast crafted wordpress hosting server'. The 'description' field contains 'How to make WordPress site faster. How to make WordPress website faster fast crafted wordpress hosting - secure and fast crafted wordpress hosting server. Learn how to make website faster with A2 Hosting. Tag - make wordpress site faster plugin. By the time you are done with installing WordPress your site will be automatically optimized for speed, and ready to go. List Of Best Host for WordPress Site: A2 Host: SiteGround is also a very good host, but I prefer A2 Hostine, since you can use them for all your WordPress sites without a'. The 'tags' field contains 'fast secure wordpress hosting, kinsta hosting, managed wordpress, kevin muldoon, hosting review, website host, website hosting review, hosting company, wordpress cloud hosting company, host, Wordpress webhosting, Wordpress hosting provider, how to get a fast website, wordpress hosting, A2 hosting review'. Below these fields, there are sections for 'Suggested titles', 'Suggested phrases', and 'Suggested tags'. The 'Suggested titles' section contains a list of titles, including 'fast secure wordpress hosting - secure and fast crafted wordpress hosting server', 'fast secure wordpress hosting - who else wants extremely secure & lightning fast wordpress hosting?', 'fast secure wordpress hosting - best wordpress hosting - fast, secure and optimized for wp', 'fast secure wordpress hosting - kinsta - fast & secure wordpress hosting', 'fast secure wordpress hosting - get faster wordpress hosting with wp engine', 'fast secure wordpress hosting - one click install wordpress with wordpress siteground hosting', 'fast secure wordpress hosting - the top wordpress website hosting providers for 2017', 'fast secure wordpress hosting - best wordpress hosting revealed', 'fast secure wordpress hosting - simple wordpress hosting- stop worrying and let us do it!', 'fast secure wordpress hosting - how to make your wordpress website run faster by changing 1 setting', 'fast secure wordpress hosting - how to stup wordpress self hosted cdn speed up 3 times faster', 'fast secure wordpress hosting - best web hosting great 2017', 'fast secure wordpress hosting - how to fix slow wordpress site on godaddy', and 'fast secure wordpress hosting - top 10 wordpress plugins 2017'. The 'Suggested phrases' and 'Suggested tags' sections are currently empty.

*This section makes optimizing your videos really simple. All I did was use the titles, tags and description generated by Video Marketing Blaster, and then added a few lines about the web hosting company I'm promoting. This whole process took less than 2 minutes. It can usually take an hour if you do it manually. You can also easily edit these fields and choose from a list of even more Video Marketing Blaster generated titles, tags and descriptions if you wish. I've tried and tested quite a lot of different YouTube tools, all promising to get you great results and tons of views. However, most have left me disappointed. Video Blaster is currently the only tool that has gotten me consistent views. The keyword finder, analysis and optimization features are behind most of the success I've enjoyed on YouTube so far. Think about it, most people on YouTube have no idea about keywords and optimizing your titles and descriptions. They either rely on luck, or having huge fan bases and followings to get any success from YouTube. With Video Marketing Blaster Pro, you don't need any fans or luck. You're simply taking advantage of YouTube's algorithms to show them that your video is perfect for the chosen keywords. Which gives you such a massive advantage over the competition... it's almost unfair.*

*It must've been about 3–4 days after uploading the video that I hit the #1 spot in YouTube for the chosen keyword. It's just a shame that the video sucks.*

*You won't just rank for your chosen keyword. But, also a number of related keywords as well. Also note the age of the other videos. They say, the older a video is, the harder it is to outrank. Yet with Video Marketing Blaster, I was able to outrank these much older videos in just days.*

Having said all that, Video Blaster Pro isn't perfect. Just like with everything out there, it does have its flaws. Keep reading...It's not exactly a deal breaker, and not a reason for me to hesitate fully recommending it. However, it's still a flaw you should be aware of... The estimated views can be off sometimes. For the most part, Video

Marketing Blaster is pretty good at giving you a ballpark figure for the amount of views you can get for a given keyword. However, sometimes it's off by a country mile. This isn't too big of an issue, since every video I've ranked using Video Marketing Blaster Pro has pulled in views.
